HOW I FIT

I can envision the future. It is amazing, and I want to help technology companies grow and succeed in that future.

I have a fascination for the capabilities of cloud tech and a crazy high respect for technical professionals who are implementing it. Combining these skills to deliver complex and high visibility IT projects has been my life's work. My career progression includes many examples of successful delivery in product creation, product delivery, and entire IT stand ups.

I am an ideal fit in a product company where I can manage and deliver new product implementations or manage the technical professionals that do.

IMPLEMENTATION EXPERIENCE

Sr. Manager - IS Ops & Infrastructure

Seventy Seven Energy

2014 - ongoing Oklahoma City, OK

Oilfield services company

- Managed complete "greenfield" infrastructure standup after spinout
- We went completely cloud. No, really, completely.

IT Manager

Chesapeake Energy

2012 - 2014 Oklahoma City, OK

Energy Exploration & Production (E&P) company

- Managed L1, L2 Support while completing major ITIL upgrade
- Developed first IT budget system and process
- Built Supply Chain Analytics function from scratch

VP & CIO

Essar Minerals Americas

2009 - 2011 Charleston, WV

Mining subsidiary of major Indian steel conglomerate

- Implemented SAP within 6 months of my arrival (FI/CO, SD-Mining)
- Transformed IT from ad-hoc Linksys routers and Best Buy PCs into a connected enterprise
